MRS. LINDBERGH TO TESTIFY

Here and There

Editorial By ALEX. H. WASHBURN

THE finest New Year thought (I told the Rotary club today) is not said in any oration nor written in any journal, that I know of, but it appears in the charter of the world's largest philanthropic organization—the Rockefeller Health Foundation.

Vaccine Found for Sleeping Sickness Tested Upon Mice

Disease May Be Stopped Just as Paralysis Has Been Stopped

ATTACKS THE BRAIN

Various Nerve "Broadcasting Systems" Affected Separately

By HOWARD W. FLAKESLEE
Associated Press Science Editor
PITTSBURGH, Pa.—(AP)—The first step in making a vaccine against encephalitis, or sleeping sickness, was reported to the American Association for the Advancement of Science Thursday.

To date medicine has no known defense against catching this disease, one of the cruellest of human ills.

Thursday's announcement was unusually significant because the sleeping sickness vaccine is following exactly the course of infantile paralysis vaccine already given safely to children, and apparently immunizing them.

The encephalitis experiments were reported by Maurice Brodie, M. D., of the New York City Health Department, during a description of the new infantile paralysis vaccine.

Last year's St. Louis sleeping sickness outbreak furnished the virus, the cause of the disease, from human beings, which the New Yorkers used for their vaccine experiments.

Mice infected with this human virus developed sleeping sickness. Their brains, containing the virus, were treated with minute amounts of formalin which killed the virus. This virus was then used as a vaccine on 100 healthy mice. It immunized them all against the encephalitis. Most important from the medical point of view, the new vaccine had no apparent ill effects on the mice.

The next steps are further animal experiments to make reasonably sure it may not harm human beings. Then the volunteers, who try it on their own bodies.

Encephalitis, like infantile paralysis, attacks the brain and has many "strains" of virus, each working a little differently. A vaccine to be useful must protect against them all.

Indications that the new infantile paralysis vaccine does just this were shown in Dr. Brodie's report. It has produced immunity against several types of infantile paralysis virus. It must be tried against many more, Dr. Brodie said, before medicine can be sure of its universal protective power.

One such test has started at Bakersfield, Calif., where he said 400 to 500 children have received the New York vaccine. It is flown to Bakersfield in thermos bottles, which keep it at freezing temperature, for freshness.

In New York, 35 children have received the vaccine and their blood serum shows in all cases signs of high immunity. Four vaccinated children showed more immunity than three children convalescent from mild attacks of infantile paralysis. In animal tests the vaccine seemed a little better than the disease, itself, for control.

FLAPPER FANNY SAYS:

REG. U. S. PAT. OFF.

Train Hits Second Car in Three Days on Grade Crossing

Two Killed by Grand Trunk Express Friday—Seven Last Saturday

3 KILLED NEAR L. R.

Alabama Rose Bowl Tourists Crash Into Truck Loaded With Wood

CHICAGO—(AP)—Two persons were killed Friday when a Grand Trunk passenger train crashed into their automobile in suburban Blue Island.

The same train last Wednesday struck a car and killed seven persons in nearby Harvey.

3 Die Near Little Rock

LITTLE ROCK—(AP)—An automobile in which six Alabama football fans had started for the Rose Bowl at Pasadena, Calif., to see the University of Alabama-Stanford game New Year's Day, struck the rear of a stalled truck on Highway 70, three miles east of the Pulaski-Lonoke county line Thursday night and three of the car's passengers were killed while the others were injured seriously.

The truck was loaded with wood but no one was on it.

The Dead and Injured

The dead:

Claude Gaut, aged about 40, of Sheffield, Ala., crushed chest, fractured skull, multiple fractures of both legs and numerous cuts.

Phil Anderson Sr., about 55, of Sheffield, crushed head.

Alvin McWilliams, about 22, of Tusculum, Ala., crushed head and broken arm.

The injured are:

Frank Huddleston, 19, of Sheffield.

McCoy Hearn, 22, of Tusculum, driver of car.

All were removed in a P. H. Ruebel & Co. ambulance to Baptist State hospital. McWilliams was dying when the ambulance reached the scene, attendants said, and the other two succumbed on the way to the hospital.

Officers Notified

Deputy sheriffs of Pulaski county were notified and started toward the Lonoke county line but, en route, they found that a minor accident had occurred in Pulaski county, and stopped. No one was hurt in the latter accident.

Officers in Lonoke county did not learn of the fatal accident until the Gazette called Sheriff R. O. Benton.

Truck Owner Gives Report

E. E. Campbell, 612 Arkansas avenue, North Little Rock, owner of the truck reported the accident at North Little Rock police headquarters last night. His brother J. P. Campbell, of the same address, and a neighbor, Bill Reynolds, 616 Arkansas avenue, he said, left in the truck Thursday afternoon for Lonoke county to haul a load of wood. On their return trip, a heavy rain drowned out the motor and the truck was stopped on the edge of the road.

Mr. Campbell said his brother, the driver of the truck, told him the lights were not turned off. Just as J. P. Campbell and Reynolds stepped from the truck cab to dry the motor, they noticed a car approaching from the north. Fearing a collision, both ran to safety.

Both Vehicles Into Ditch

So terrific was the impact that the truck was thrown into a ditch on the left side of the road. It turned over, and stove wood was scattered over the highway. The passenger car turned over in a ditch on the right side. Both vehicles were demolished.

Campbell and Reynolds hurriedly

6 Appointments by Futrell Expected

3 Vacancies on U. of A. Board—1 on Highway Commission

LITTLE ROCK—Six appointments to four important state boards or commissions to fill vacancies or to replace members whose terms will have expired must be made by Governor Futrell before or during the coming session of the legislature. These and several other appointments made during the past year will be submitted to the senate for confirmation.

Boards and commissions on which vacancies exist or terms will expire before the legislature adjourns are:

Board of Trustees of the University of Arkansas: Fred I. Brown, Little Rock, term will expire March 1; T. D. Wynne, Fordyce, deceased, term would have expired March 1, and H. M. Jackson, Marianna, deceased, term would have expired March 1, 1935.

State Highway Commission: Ben Johnston, Fort Smith, term expires February 1.

Livestock Sanitary Board: Dr. R. W. Williams, El Dorado, term expires February 1.

(Continued on page five)

Bulletins

CLARKSVILLE, Ark.—(AP)—Townsend Brock, 21, College of the Ozarks freshman football player, was found dead in bed Friday, apparently the victim of a heart attack.

ADDIS ABABA, Abyssinia—(AP)—An unconfirmed report received here Friday said that Ethiopian and Italian forces had clashed again 40 miles west of Addis, with numerous casualties.

Roosevelt Silent as to Bonus Plan

Vanderburg Proposes Civil Service for All Postmasterships

WASHINGTON—(AP)—Strategy to strike a bargain on the soldiers bonus, if the Democratic high command considers such a move to be warranted when the 2-billion-200-million-dollar issue comes to a head, was being studied tentatively Friday by some administration leaders in congress.

They emphasized the fact, however, that they had had no hint from the White House.

Although there is much talk of possible compromises the president has made no statement of his attitude on them.

Would Stop P. O. Politics

WASHINGTON—(AP)—A proposal to take the Postoffice Department out of politics by establishing it on a permanent "career service" basis, was announced Friday by Senator Vanderburg, Michigan Republican.

He said he had drafted a bill to put all postmasters and postal officials, except the Postmaster General himself, under civil service.

The bill would prohibit the Postmaster General from holding any political office while heading the postal service.

The Michigan senator said he had written the bill after conferences with the Civil Service Commission and various service organizations within the Postoffice Department.

"Kingfish" Strikes Again at Orleans

Legislative Committee Gathers for Probe of Walmsley

NEW ORLEANS—(AP)—Huey Long, whose 1934 political practices brought him the dictatorship of Louisiana and rosy dreams of sitting in the White House, struck a year's end blow Friday at his New Orleans foes.

Long's legislative committee assembled at his call to hear more testimony concerning the administration of Mayor T. Semmes Walmsley—an investigation started in September when the Kingfish and the mayor summoned opposing "ignomies" for the primary election.

One of the committeemen, Representative William J. Hammond, of Jackson Parish, hurrying to attend the session, was killed in an automobile accident Thursday near Laplace.

Other members were ready to sit in a downtown skyscraper office building and hear witnesses behind closed doors to the press and public, but with the proceedings broadcast.

Long started his investigation just before the September 11 primary election in which his candidates trounced those of Mayor Walmsley and shattered the hitherto unbeaten forces of the city.

It was in that election that Long brought about 2000 fully armed national guardsmen into the city and Walmsley marshaled almost as many policemen.

Early sessions of the investigating committee produced testimony that Walmsley and other city officials had been receiving regular cash payments from gamblers and prostitutes and that city financial affairs were in a "mess." These charges were vigorously denied by Walmsley.

Thomas Maps Plan to Cut Dollar Again

WASHINGTON—(AP)—Shaving 30 cents more off the value of the dollar is the goal set by Senator Thomas (D., Okla.) as he prepares for the January 16 conference designed to align various inflationist groups behind a common program.

The aim of the meeting, he said, will be agreement on a proposal to congress "to finish what the president started to do." It was "generally understood," he said, that the president intended to bring the dollar down to the 1926 level.

January U. S. Relief Reduced; Charity Checked Up to States

Local Funds, Matching Federal Aid, Increase Sharply—Minimum Wage for Work Relief Is Reduced

WASHINGTON—(AP)—A campaign to cut federal relief outlays by requiring states to take responsibility for "unemployables" was announced Thursday night by the administration. The move coincided with efforts by President Roosevelt to work out an elastic relief budget capable of curtailment as business improves.

The relief Administration also disclosed partial allotments for January totaling \$136,791,265, as compared with an aggregate of \$151,000,000 disbursed thus far in December.

Harry L. Hopkins, FERA administrator, said that state and local funds spent for unemployment relief in the first 10 months of 1934 were 30 per cent greater than in the corresponding period of 1933.

Local Funds Increase

State and local funds used for relief during the first 10 months of 1934 totaled \$323,800,550, an increase of \$71,514,677 over \$252,285,883 for the first 10 months of the preceding year.

Ends February 1

LITTLE ROCK—(AP)—State Administrator W. R. Dyess Friday gave a second official notice to the state and county relief organizations that federal relief to unemployables would cease February 1.

Hopkins returned to his office from a White House conference on next year's relief budget to announce the effort to eliminate unemployables by February 1. With their dependents, this class, he said, constitutes 20 per cent of those on federal relief. Some saw in this another major indication of a shift for employable from direct grants to work relief.

While the saving probably would not be correspondingly large, for the reason that state outlays for this purpose would be taken into consideration in connection with the question of adequate state contributions, Hopkins hoped that it would nevertheless be considerable.

Minimum-Wage Cut

LITTLE ROCK—A minimum wage of 20 cents an hour for highway and similar work and a minimum of 15 cents an hour for farm labor and other work in rural centers of 2,500 population and less was agreed upon Thursday, following an all-day meeting of the state FERA Wage Board.

W. A. Rooksby, state director of the National Re-employment Service and chairman of the Wage Board, announced.

Under wage scales set by the old CWA and later by the FERA on work projects, the minimum wage paid was 30 cents an hour.

The scale for skilled workers will be fixed later by county wage boards, subject to final approval by the state board. Former skilled wages ranged from 60 cents to \$1 per hour, according to the state zone.

New Year Program Is Held by Rotary

Musical Numbers and Club Member Talks Feature Luncheon

A musical program with club members' talks based on the approaching new year, featured Friday's Rotary club luncheon in Hotel Barlow.

Mrs. Dickson Watkins sang two numbers, "June and January" and "I, S. I. Love You," and young Bill Routon, son of Mrs. Ralph Routon, gave three selections on the harmonica.

Max Cox led the club singing.

New Year talks were made by Roy Anderson, program chairman, and A. H. Washburn.

Guests were: P. A. Dulin, Hope; Tom Carter, Monroe, La., formerly of Hope; and Joe Black, of Houston, Texas.

Farm Credit Body to Elect Jan. 7

Every Borrower Asked to Be Present at Nashville Session

Hempstead county farmers who are members of the Nashville Production Credit association will attend the first annual stockholders' meeting of the association at Nashville, Ark., the headquarters of the association, on January 7.

The members of the association who are the borrowers and stockholders will vote on officers for the coming year. A representative of the Production Credit Corporation of St. Louis will be present at the meeting and will include a review of the past year's business, a clear and complete statement of the operations of the association, and a discussion of plans for next year.

The Nashville Production Credit association makes loans to farmers in this county for agricultural production purposes. The loans are made for 3 to 12 months and at present bear 5 per cent interest. They are not made from Federal funds but are accounted by the Federal Intermediate Credit Bank from funds obtained through the sale of debentures to private investors.

Every farmer who has borrowed money from the local association has purchased voting stock and regardless of the amount of stock owned has one vote in selecting the management of the organization.

"Every borrower should be present and vote for the most capable men available for the board of directors and thus assure continued good management for the organization that has been built for the farmer's permanent benefit," said F. W. Dismeyer, president of the Production Credit Corporation of St. Louis, in pointing out the importance of attendance at the annual meeting.

Britain Proposes Pan-Europe Pact After Saar Vote

Reported Backed by France and Italy in General Security Move

NAZIS STORM SAAR

Meet Assault on Hitler With Counter-Attack—Vote January 13

LONDON, Eng.—(AP)—An authoritative diplomatic source stated Friday that Great Britain, with the cooperation of France and Italy, will propose a general security pact embracing almost all the countries of Europe immediately after the Saar plebiscite.

The nature of her testimony was not revealed.

At the same time it was learned that the state will not accept the offer of John Hughes Curtis, Norfolk, Va., shipbuilder and convicted hoaxer in the Lindbergh case, to testify for the prosecution.

Had Too Much Cash

FLEMINGTON, N. J.—(AP)—The state will declare at Bruno Richard Hauptmann's trial, a prosecuting official disclosed Friday that the Lindbergh kidnaper-slayer suspect has had in his possession in the last two years \$45,000 more than all his avowed sources of income provided.

The money will be identified by the state, this official said, as the bulk of the \$55,000 ransom which Dr. John F. Condon, Lindbergh intermediary, paid in a Bronx cemetery April 2, 1932.

Efforts to trace the ransom notes were redoubled after Hauptmann's arrest and the state now is reported to have obtained evidence linking all but a few hundred dollars to Hauptmann.

Scores of the auditors, accountants, federal investigators and detectives who ran down the money and checked it are reputedly on the state's witness list.

A single motive—extortion—led to the crime, state officials believe. The new evidence will be used by the state, a member of the prosecuting staff said, in its efforts to prove that Hauptmann alone abducted Charles A. Lindbergh, Jr., collected the ransom and disposed of it himself.

Defense attorneys hold that a "gang" committed the crime while Hauptmann told New York police that the ransom money, about \$15,000, found in his garage was given him by Isador Fisch, a friend who has since died.

36,000 Killed in Autos During 1934

Highway Death Rate Rises 16% From Preceding Year's Record

HARTFORD, Conn.—(AP)—At least 36,000 persons in the United States were killed in automobile accidents in 1934, year-end statistics of the Travelers Insurance company showed Thursday.

The death and injury list for the year, the insurance company report said, marked the high point in destruction on streets and highways.

The record showed a person killed every 15 minutes, and one injured every 31 seconds in automobile mishaps.

While the death rate showed an increase of 16 per cent over 1933, the statistics showed a decrease in the frequency of accidents.

Every section of the country reflected the increase in automobile deaths. The middle Atlantic states comprising New York, New Jersey, and Pennsylvania, showed the slightest increase, however—a gain of less than one per cent.

The toll by states:

Middle Atlantic: Approximately 6,500 killed. New York and New Jersey had fewer deaths than 1933.

New England: More than 2,000 killed, a 12 per cent increase. New Hampshire and Connecticut had fewer deaths than last year.

East North Central (Indiana, Illinois, Ohio, Michigan and Wisconsin): Nearly 8,500 killed; an increase of 16.4 per cent.

East South Central (Kentucky, Tennessee, Alabama and Mississippi): Nearly 2,600 killed; an increase of 34 per cent.

West South Central (Arkansas, Louisiana, Oklahoma and Texas): Incomplete statistics indicate 3,000 killed. No computation on increase or decrease.

Mountain states (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah and Nevada): More than 1,400 killed; an increase of 31 per cent.

West North Central (Minnesota, Iowa, Missouri, Nebraska, Kansas, North and South Dakota): 3,400 killed; an increase of 12 per cent. South Dakota showed a decrease.

South Atlantic (Maryland, Virginia, Delaware, West Virginia, North and South Carolina, Georgia, Florida and the District of Columbia): 4,000 killed; an increase of 21 per cent. Delaware showed a decrease.

Pacific states: 3,700 killed; an indicated increase of more than 18 per cent.

Boastful Bandit May Be Fugitive

Escaped Arkansas Convict Suspected in Oklahoma Holdup

FORT SMITH, Ark.—(AP)—A boastful bandit, believed to be Thomas Tiller Richmond, escaped trustee from the Arkansas prison farm, released a Tulsa taxicab driver at Moffett Friday after a successful escape from a holdup scene last Monday.

Richmond is accused of a similar holdup at Little Rock on the night of his escape from Tucker Farm. He is a native of Conway, Ark.

4.74 Inches Rain to Date, December

Total of Half Inch Rain Reported During Drizzly Thursday

Slightly more than half an inch of rain fell for the 12-hour period ending at 5:30 p. m. Thursday, bringing the total precipitation thus far for the month of December to 4.74 inches, the Fruit & Truck Branch Experiment station reported Friday.

From 5:30 a. m. to 5:30 p. m. Thursday the rainfall measured .53 inches. Correct figures from 5:30 p. m. Thursday on rainfall through the night and up to Friday noon, were not available.

The heaviest rainfall for any single 24-hour period was recorded December 2 when 1.95 inches fell. December 17 was the next heaviest with 1.03 inches.

By the Associated Press

A winter hurricane lashed the New England seacoast Thursday and swept over the White mountains with a velocity of 175 miles an hour. It was the last phase of a winter storm that had brought sub-zero temperatures, snow and high winds in a wide sweep across the Northern states.

Tragic accompaniments of the wintry weather were the deaths of seven little girls—three of them daughters of Harry Hammond, truck driver at Mishawaka, Ind. They died in flames in their one-room house when a pot of oil, warming on the stove to thaw the car, boiled over.

Four other little sisters, two to eight years old, drowned in Hughes river at Harrisville, W. Va., when their rowboat capsized.

A mile-a-minute gale tore into New England, wrecking communication lines, destroying trees and unroofing buildings. Boston clocked the wind at 66 miles an hour. Springfield, Mass., at 75 and the instruments atop Mount Washington, N. H., were taxed to meter the gale at 175 an hour and the temperature at 30 below zero. It warmed up to 17 below at noon Thursday.

Wife of Famous Flier Called in Hauptmann Trial

Bereaved Mother to Face Accused Man in Murder of Her Child

CURTIS IS REFUSED

Hoaxer Offers to Testify for State—But He's Not Wanted

TRENTON, N. J.—(AP)—Mrs. Anne Morrow Lindbergh, it was learned from an authoritative source Friday, will be called as a witness for the prosecution in the trial of Bruno Richard Hauptmann, which starts at Flemington, N. J., next week.

Hauptmann is charged with the murder of Mrs. Lindbergh's infant son.

The nature of her testimony was not revealed.

At the same time it was learned that the state will not accept the offer of John Hughes Curtis, Norfolk, Va., shipbuilder and convicted hoaxer in the Lindbergh case, to testify for the prosecution.

Had Too Much Cash

FLEMINGTON, N. J.—(AP)—The state will declare at Bruno Richard Hauptmann's trial, a prosecuting official disclosed Friday that the Lindbergh kidnaper-slayer suspect has had in his possession in the last two years \$45,000 more than all his avowed sources of income provided.

The money will be identified by the state, this official said, as the bulk of the \$55,000 ransom which Dr. John F. Condon, Lindbergh intermediary, paid in a Bronx cemetery April 2, 1932.

Efforts to trace the ransom notes were redoubled after Hauptmann's arrest and the state now is reported to have obtained evidence linking all but a few hundred dollars to Hauptmann.

Scores of the auditors, accountants, federal investigators and detectives who ran down the money and checked it are reputedly on the state's witness list.

A single motive—extortion—led to the crime, state officials believe. The new evidence will be used by the state, a member of the prosecuting staff said, in its efforts to prove that Hauptmann alone abducted Charles A. Lindbergh, Jr., collected the ransom and disposed of it himself.

YOUR HEALTH

Editor, Journal of the American Medical Association, and of Hygiene, the Health Magazine

Simple Cures Prevent Catching of Cold

Probably you know how to treat a cold but if you're like most people, the cold will get a good grip on you, regardless of what you do for it. People have tried to harden themselves against colds by taking cold baths, but scientific studies do not indicate that this method is anywhere nearly certain in prevention. Vaccines, injections, and "shots" have been used under a wide variety of conditions, but the majority of physicians do not seem to endorse them. Ultra-violet rays and preparations containing the vitamins have been widely advertised as especially useful in preventing colds, but carefully controlled studies do not indicate any unusual virtues in such methods. The rules for protecting yourself against colds are fairly simple: Avoid contact with people who have them.

Look out for sneezing and coughing when you are in a street car, an elevator, a movie, or any similar enclosed place.

Avoid getting your feet wet; avoid sudden changes in temperature; avoid chilling.

Remember that most doctors are convinced that colds are caused by germs which seize the body when its resistance is lowered. Germs come from noses and throats of other people, and we also have some germs in our bodies at all times.

The ones we have will let us alone unless our resistance breaks down. Then they take hold.

The germs from other people come to us not only by contact, by coughing and sneezing and kissing, but also by less intimate contacts—through pencils, doorknobs, and it has been said, even on money. However, money is not a very serious hazard.

The most important step about a cold is to take care of it and not neglect it. In taking care of a cold don't try to knock it out with alcohol. While alcohol does give a feeling of warmth on the skin and may make you feel better without actually doing you any good, it is perhaps doing you some harm.

When you are in bed after a long cold exposure, your doctor may allow you a small dose of alcohol to give you the warm, comfortable feeling that comes with such dosage.

Just about the same effect can be obtained, however, by a hot mustard foot bath, a drink of hot coffee, or a drink of hot lemonade.

A BOOK A DAY

By BRUCE CATTION

How Psalms Speak For Men of Today

A very remarkable, striking, and freshly very beautiful book has just been published, "The Psalms for Modern Life," interpreted with drawings by Arthur Wragg, British artist. What has been done is simply that the Psalms have been reprinted, with some dozen of exceedingly forceful black and white drawings to illustrate certain of their texts. But the effect is surprising.

Mr. Wragg has succeeded in calling to our attention the fact that the magnificent poetry of the Old Testament is just as alive now, just as pertinent to contemporary life—just as "modern," in fact—as in King David's time.

You find, for instance, such a sentence as, "The Lord shall help them, and deliver them," and with a simple drawing Mr. Wragg suddenly forces you to discover that "they" are none other than the distressed and forgotten people of the slums and the tenements.

Or the familiar passage about walking through the valley of the shadow of death without fear; this, says Mr. Wragg, applies to the operating table of a modern hospital just as well as to a Syrian shepherd.

The line, "Yet the Lord thinketh upon me; thou art my help and my deliverer," is the hopeful cry of the kilted, crippled London apple-peddler, just as it was of the king of ancient Israel.

And so it is with the rest of the

YOUR CHILDREN

By Olive Roberts Barton

Sleepy Children—Don't Regard Tired One as Lazy Because He May Only Be Ill

Sleep may bind up the raveled sleeve of care, but it takes longer than it does to rest the arm in the sleeve.

By this I mean that sensitive high-strung children and those who live too greatly on emotion need a great deal of solid slumber.

Usually they are hard to get up in the morning. And when they do get up they don't feel right. Parents are apt to call them lazy and the other children make fun of them.

And so, poor little souls, added to their physical weariness are more troubles.

Usually they are too thin, but not always. Such a child may deceive even a watchful eye. The reason may be that after he has been up and around for an hour he appears to function normally, but this is probably because he begins to live on his nerves again.

Doctors Often Puzzled

Causes are obscure, of course. Even the best of doctors are sometimes puzzled by this languor and sick feeling in some children after sleep—apparently enough sleep too.

Once in awhile it happens that the hard-to-get-up child has had some high-grade disease, scarlet fever, typhoid, diphtheria or something else, and has never quite gotten over it. There is a new theory that in sporadic cases some of the germs still linger. This, of course, is too unusual to apply generally. It is merely a thought.

It seems sensible to think that a child may be, at the best, generally vitiated from the results of a disease. Just not quite strong and normal, that is, for a long time after. Or that there may be infection of some sort not accounted for by tonsils, teeth or adenoids.

Whatever it is, it should not be called laziness.

Sometimes a fatigue child, known as such to the doctors, lacks certain balance of body chemistry. This is a matter for hospital treatment and diagnosis as such should not be foisted with a bad name.

Attitude Shows Fatigue

The real fatigue child shows it in his attitude. Hanging shoulders, hanging jaw, a distressed drawn expression in the eyes, bad color and little or unnatural appetite.

Once the fatigue child gets to sleep he usually wants to go on sleeping forever.

Whatever the reason for not wanting to get up, whether the cause is nervous, body-fat or infection, it should be called to the doctor's attention. Naturally the first thing he will say is to give this little boy or girl at least ten long hours sleep at night and a rest in the afternoon.

If that still doesn't work and all other attempts to build him or her up fail, then he will do some really serious analyzing you may be sure.

I think children don't get enough sleep, that they live these days under too much pressure and excitement and all that. But most of them seem to stand it pretty well. It is only the exceptional child who needs this special attention. But just calling him lazy won't cure him. He simply can't help it.

GLORIFYING YOURSELF

By Alicia Hart

Women with regular, finely molded features are the only ones who don't have to worry a great deal about their hair.

They have long, short, round or thin faces, a sleek, close-to-the-head coiffure undoubtedly will be best. You can draw your hair backward, fastening it at the nape of the neck or, if you like, go in for a queenly, high-in-the-back arrangement. If your ears are nice, by all means show them.

The girl with a thin face should fluff her hair out on the sides in such

Alabama Favored to Beat Stanford

American Football Coaches Think Southerners Are Strongest

NEW YORK—(AP)—A substantial majority of college football coaches favors Alabama to beat Stanford in the forthcoming "Rose Bowl" intercollegiate battle at Pasadena. Polls Thursday by the Associated Press, 16 out of 27 coaches selected Alabama to win, while six picked Stanford and five straddled the issue.

Here's the symposium of their views:

Dana X. Bible, Nebraska: It's a tossup. Stanford will be in better mental condition for this game than it was last New Year's.

W. H. Cowell, New Hampshire: Alabama, unaffected by climatic conditions, should win by a touchdown. Gilmore Dobie, Cornell: It's too close to decide.

Earl Black, Dartmouth: It looks close but I look for Stanford to come strong in the second half.

Fritz Crisler, Princeton: Stanford should win because this is a "redemption" game for the Indians.

Earl Martineau, Princeton: Stanford to win, on power.

Harry Ellinger, Dartmouth: Alabama to win.

D. O. (Tuss) McLaughry, Brown: Alabama has an edge.

Andy Gustafson, Dartmouth: Stanford is my choice.

Elmer Layden, Notre Dame: Alabama should win, though Stanford will be better than last season.

Dr. Marvin (Mog) Stevens, New York U.: Stanford to win.

Burt Ingwersen, Louisiana State: Alabama, with a great line and better reserves, gets my vote.

Hugo Bezdek, Penn State: Alabama's the choice.

Harry Stuhldreher, Villanova: I like Alabama, a better rounded team.

Hank Anderson, North Carolina State: Alabama has a great club and should win.

Harvey Harman, Pennsylvania: It's a tossup, unless Alabama proves to have marked edge in condition.

Lieutenant Thomas, Hamilton, Navy: No choice between two strong teams.

Eddie Casey, former Harvard coach: Alabama for me, especially if Grayson is not in shape.

Fielding H. Yost, Michigan: Alabama may have little edge, because of better condition, but it's likely to be a great tie.

Dan McGuin, Vanderbilt: Alabama has its best team and should win, if it plays up to season's form. It has everything.

Francis Schmidt, Ohio State: Alabama, by a shade.

Charles Bachman, Michigan State: I like Alabama.

Propose 9 Changes in Football Rules

Suggestions Brought Forward Despite Opposition of Most Coaches

NEW YORK—(AP)—Although 80 per cent of the football coaches voting on the subject have gone on record as opposed to any radical changes in the college gridiron code for 1935, it developed Thursday night that a list of nine proposed alterations has been drawn up by a minority group for the consideration of the National Football Rules Committee.

The proposed changes:

1. Return goal posts to goal line.

2. Allow incoming substitutes to communicate.

The Season's Greetings

The females of the bustard quail, of Africa and Asia, are the larger and prettier birds. They do the calling and fight over the males, while the males set upon the eggs.

If kept in a room where it cannot catch flies, the Darlingtonia plant may be kept healthy by a diet of raw meat. This plant lures insects and absorbs them in its digestive fluid.

Peru is estimated to contain 6,250,000,000 tons of coal, of which 73 per cent is lignite, 20 per cent anthracite, and 7 per cent various kinds of bituminous.

Lovable

By MARY RAYMOND
© 1934 NEA SERVICE, INC.

BEGIN HERE TODAY

ANN HOLLISTER breaks her engagement to TONY HICKLE the same day that PETER KENDALL tells VALERIA BENNETT, his fiancée, that everything is over between them.

She still loves Tony and Peter, but she still loves Peter, but when chance brings the two together and Peter asks Ann to marry him she agrees.

They go to Florida and are happy there. Then Peter is recalled home. His family makes trouble between Ann and Peter. She succeeds and Ann goes away, leaving no hint of her whereabouts.

Peter is disconsolate, believing Ann has discovered his love for her and gone because she can not return it. His efforts to find her are fruitless. One day he receives a message to come to a certain address and rushes there, hoping to find Ann.

NOW GO ON WITH THE STORY

CHAPTER XXXII

THE address on Bond street, when Peter arrived there, proved to be an unimpressive brick apartment building. There was something depressing about the exterior and something infinitely more depressing about the interior.

But to Peter it appeared as a green oasis in a barren desert. He would find Ann here! He was sure the telephone message had come from her.

He ran up the uncarpeted steps, hearing voices above. The door to one room was open. It must be filled with a great many people, for some of them had spilled out into the hall. Peter recognized them as reporters.

He scowled blackly. If they were giving Ann trouble—

And then he stood for a moment, weak from disappointment, leaning against the door.

An angry young man, with pillocks at his back, was sitting up in bed talking very crossly to his visitors, who grinned cheerfully back at him and went on taking notes.

The angry young man was Lawrence, the former chauffeur, but he wore no uniform. Then Peter saw Carol.

"Oh, Peter darling! I'd about given you up—what a time you took to come! Peter, these men know the whole story about my slipping off the train and coming back to marry Larry. How do they find out things like that? Peter, can't you keep them from putting it in the paper?"

Then, by degrees, Peter heard what had happened. His sister had married the young football hero who had been dropped from college last spring for some escapade and whose disappearance had stirred the sport world.

"I had a tip that Ames was in town, working as a chauffeur or taxi driver," one reporter told Peter. "Ames fellow told me when Ames lost his job, tipped me off to where he was staying. I recognized your sister, did some sleuthing until I found out about the marriage and then came here to get the complete story. And what do I find? Reporters from every sleazebag in town camping on the doorstep. The same fellow must have told everybody else. Gosh, what a tough break when I thought I had it exclusive!"

"Now, if you will just pose with your arm about his shoulder," a camera man was saying persuasively to Carol.

"The idea! I will not."

"I guess they'll have a picture of you in the society files. And I know the files are full of pictures of Ames."

"What does it matter? What difference does it make? Peter had said later, 'All that matters is being happy. The next thing is to get you youngsters home.'

Carol followed him to his car. "Peter, something has happened to you. Why didn't Ann come?"

Peter told her. And then he was hearing about Ann's visits, her pledge to secrecy.

No use now to be ashamed of his unjust doubts, when a more terrible doubt was tormenting him.

THE newspapers apparently thought Carol Kendall was to be congratulated for winning the young man whose football playing had made him an idol. His father had received the news of the marriage over telephone and was coming along at once.

It was upon the note of, "I can forgive everything except your not taking me into your confidence," that Mrs. Kendall met the runaways. She had been influenced by the newspapers. To her amazement Lawrence Ames, and not his marriage to Carol, was the dominant theme of all the articles.

Peter went out to break the news to his grandfather and stayed all night. The elder Kendall was genuinely shocked by the change in his grandson.

Peter looked thin and worn. His eyes were stricken. But the greatest change was not physical. He showed a weariness of spirit, a letting down mentally and spiritually. Peter didn't seem to care what happened. The world could go to smash. It already had smashed for Peter.

The labor trouble at the factory had been cleared up. Prices were rising and his grandfather had revised the salary scale, with substantial wage increases. The arbitration committee had become a permanent organization and differences had been ironed out, for the time, at least. Peter's grandfather gave his grandson the credit.

"When he starts something," old Peter said with pride, "he doesn't stop until he finishes it."

YES, matters had been righted, but the old gentleman thought this only half-heartedly, feeling that things were far from right when young Peter was so unhappy.

"I wish you had never seen that girl, Peter," he said. He had blamed Ann for marrying Peter, but never as he blamed her now for leaving his son. She must be made to leave a fine boy like Peter.

Peter went back to town next morning and plunged into work. He had an early dinner and returned to the office. The April day had turned warm, almost summer-like. No night breeze had sprung up to relieve the closeness. The plans he had unrolled lay untouched upon his desk.

The telephone rang. Valeria's pleading voice said, "Peter, I'm lonely. It's deadly here."

Peter was lonely, too. And it was deadly where he was.

"Please, I need to get out. Won't you come?"

"Yes, I'll come."

"Soon?"

"Within the hour."

"I may pull you out on a party—just a few friends."

"I'll be there as soon as I drop by the club and change."

"Oh, thank you, darling."

Valeria's eyes were bright with excitement when she put down the telephone. She had hardly dared hope, like everybody else, Peter could stand only so much unhappiness. She must make the most of this softened mood. If she could only persuade him to commit himself, to promise to start divorce proceedings!

Peter did not drink. But if he could be persuaded to drink a little now, he would fall in with her plans better.

She handed him a cocktail soon after he came. "Just one, you old teetotaler. Peter, you really need to get off the wagon."

He smiled mirthlessly. Did she think that this small drink could chase his devil, get him in the proper party mood?

A gay party was in progress at Dirk's apartment. Glasses were being filled and re-filled as Peter and Valeria entered. Voices, too shrill, too loud. Girls sitting close to men, their hands boldly clasped. Light talk and glances holding.

Valeria had said, "We're going to Dirk's. I just want to show you how harmless a place it really is."

"Hello, Peter! Will wonders never cease?" It was Dirk's voice. "Glad Valeria brought you."

"Peter's having something with me," Valeria said, her glance slanting toward Dirk. "One of your famous drinks, Dirk."

Dirk smiled. Valeria was getting ready to put the screws on, was she? Well, it would be fun to watch the little devil.

Peter took the glass, looking down at it darkly. Valeria wanted him to drink. Well, if it gave her any fun, why not? He drank the mixture and put the glass down.

"Let me fix you another."

"Thanks," said Peter. "If you will."

Dirk took the glass and refilled it. After a while he looked at Peter and registered admiration. The fellow was certainly a cool hand. He knew how to hold his liquor. He had heard that Peter Kendall was not a drinking chap. For an amateur he was certainly good. He was sure that if Peter were outwardly calm, some turmoil was going on inside.

It was right. Peter was watching the frequent inroads on the sandwich plates, glasses being emptied and filled again and again, the loosening of tongues and manners. He hated Valeria's hot, possessive little hand, clutching at him. "Peter, darling, get me a sandwich. There. Dirk, Peter's not drinking enough. Look at that perfect balance."

Peter crossed the room to the table where fresh platters of sandwiches had been placed. Dick tiddled, very much incriminated, was talking.

"It's the joke of the season. What? Married her for spite and then falls in love with her. Then the girl lights out—doesn't even wait to get well—what the hell?"

Peter said coldly, "I don't like your kind of stories." His fist shot out.

(To Be Continued)

Carl Hubbell Has Best Run Average

No. 1 National League Pitcher, Though Dean Won More Games

NEW YORK—(AP)—In arranging the National League pitchers of 1934 in the order of their effectiveness, it was found expedient to classify them into three groups, the same arrangement that has been followed in the league since 1907. The first group embraces those who bore the brunt of the campaign and pitched at least 10 complete games; the second, those who participated to some extent in a minimum of 10 games; the third, all others who took part in a championship contest.

The percentage of games won and lost is given, with notation of the relative position of each pitcher, this special record being supplied in order that comparison may be made with the official earned run rating.

Carl O. Hubbell, New York, tops the pitchers with the lowest average of 2.30 runs earned per nine-inning game, leading in this respect for the second consecutive year. Hubbell also pitched most complete games, 25, and allowed most sacrifice hits, 19.

Curtis Davis, Philadelphia, pitched in most games, 51.

Robert E. Smith, Boston, finished next games, 25.

Van L. Mungo, Brooklyn, pitched most innings, 375; faced most batsmen, 1,329; allowed most hits, 300, and gave most bases on balls, 104.

Jerome H. Dean, St. Louis, won most games, 30. For the third consecutive year he struck most batters, 155, and he pitched most shutouts, seven. With only seven defeats Dean had the highest won and lost percentage, .811, and he became the first pitcher to achieve 30 victories since Grover C. Alexander turned in a like amount with Philadelphia in 1917.

Silas K. Johnson, Cincinnati, lost most games, 22; allowed most runs, 150, and most earned runs, 125.

William Swift, Pittsburgh, hit most batsmen, eight.

Lou Gehrig, New York, made most errors, 10.

Five pitchers, four less than in 1933, pitched 20 or more complete games.

Paul Dean, St. Louis, pitched the only no-hit game of the National League season on September 21 in

the second game of a double-header against Brooklyn. St. Louis by using seven pitchers in the game of July 6, against Cincinnati, tied the National League record held jointly by Brooklyn against Philadelphia, first game of a double-header, July 4, 1929, and Philadelphia against Pittsburgh, first game of a double-header, June 14, 1930. Six of the St. Louis pitchers did not have a time at bat against Cincinnati.

Philadelphia in the second game of a double-header against St. Louis, June 17, used five pitchers in one inning.

Although the body of a cormorant is much lighter than an equal volume of water, the bird can submerge itself with ease.

The Old Year and the New
As the dead year is clasped by a dead December,
So let your dead sins with you dead days lie.
A new life is yours, and a new hope.
Remember,
We build our ladders to climb to the sky.
Stand out in the sunlight of Promise, forgetting
Whatever the past held of sorrow or wrong.
We waste half our strength in a useless regretting;
We sit by old tombs in the dark too long.—Selected.

Mr. and Mrs. N. W. Deuty had as Christmas guests, Mrs. Caswell McRae and Philip McRae of Fayetteville.

Mr. and Mrs. John Hatley and two little daughters of Warren, arrived Thursday for a few days visit with Mrs. Corn Stagg and other relatives.

Mr. and Mrs. E. S. White, Miss Nancy White and Ess Jr., left Friday morning for their home in Jackson, Miss., after a holiday visit with Mr. and Mrs. R. T. White and friends.

Mr. and Mrs. R. V. Herndon kept Open House Thursday evening as special compliment to Mr. and Mrs. Joe Pat Black of Beaumont, Texas. The rooms were bright with holiday colors, and pots of growing poinsettias and ferns, and a most tempting buffet supper was served.

Mr. and Mrs. D. L. Bush and daughter, Margaret and Miss Mary Joe Brady left Thursday for a visit with relatives and friends in Fort Smith.

Mr. and Mrs. T. A. Middlebrooks had as holiday guests, Mrs. W. A. Jackson of Benton, Mr. and Mrs. J. E. Perry and little daughter, Margaret of Smackover and O. F. Middlebrooks of Athens, La.

Mr. and Mrs. J. W. Wellborn have returned from a holiday family reunion in Hot Springs.

Miss Lenora Rounton will have as week end guest, Miss Margaret Crawford of Arkadelphia.

Mrs. Marie McCorkle has returned from a visit in Little Rock, where she was called on account of the passing of Mrs. Claude McCorkle, whose death occurred in Little Rock last Sunday.

Mrs. Ella Bright and Miss Dove Knotts spent Christmas with Mrs. S. H. Battle at Blevins. Mrs. Battle was hostess at a beautifully appointed turkey dinner on Tuesday evening.

Covers were laid for Mr. and Mrs. Hugh Nolan, Mr. and Mrs. Philip Ward of Blevins, Misses Era and Thalia Nolan of Texarkana, Mrs. Ella Bright and Miss Dove Knotts, Mrs. Battle and Gray Battle.

Rev. and Mrs. Wallace R. Rogers announce the arrival of a little daughter, Jane Elizabeth, weight 7½ pounds, Friday, December 28th at the Josephine hospital.

Mr. and Mrs. J. B. Burton Jr., of Lewisville, announce the arrival of a little son, J. B. Burton III, on Friday night December 21, at Josephine hospital.

Mr. and Mrs. George M. Green have as holiday guests, their daughter, Miss Elizabeth of the Fayetteville High School faculty and their son, Carl, of Texas A. & M.

Mr. and Mrs. Chas. Dana Gibson had as Christmas guests, Mr. and Mrs. Harry Daly of Corinth, Miss.

The following announcement taken from Thursday Texarkana Gazette will be of interest to the many friends of the bride in this city: "Mr. and Mrs. F. W. Duke, of Magnolia, announce the marriage of their daughter, Evelyn, to L. H. Hussing, son of Mr. and Mrs. Charles C. Hussing, 214 Ash street. The wedding took place June 24, 1934, in Ashdown.

NEWS CHURCHES

CHURCH OF CHRIST
West Fifth and Grady Streets
Glenn A. Parks, Minister
Bible study 10 a. m. Preaching services 11 a. m. and at 7:15 p. m. Subject for morning sermon, "Resolving." Subject for evening lesson, "An Advancing Church."
Why not begin the New Year by attending religious services? If you are a member of the church, and have been faithful, why not resolve in your heart that you will do your duty to God and help save the world from sin and ruin? Would that not be the thing to do? The Church of Christ is always glad to have you attend. We are trying to make the services as much like the first church as is possible.

The victory of Wolfe at Quebec was not due to luck in finding the path up the steep surrounding cliffs, but to the thorough work of a British spy, known as "The Intelligent Gentleman." This spy furnished Wolfe with complete plans of every detail of the city. Wolfe died with the map in his hands.

John Martell, an Englishman, and Hennessy, an Irishman, were the first to distill cognac and export it to Great Britain and its colonies. Their distillation took place in the French town of Cognac, from which the product derived its name.

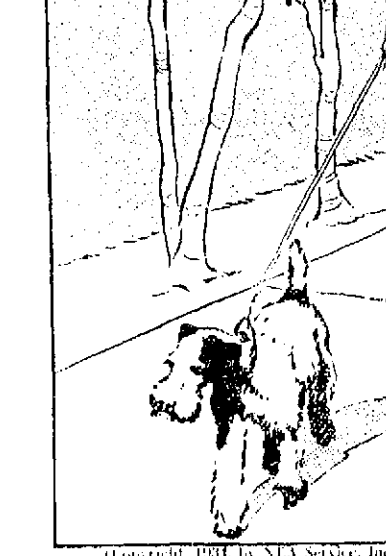

An Italian has invented a burglar alarm, for use in hotels or apartment houses, which rings a bell and signals on a central switchboard at an attempt to force the door of a room or open a lock with any but the right key.

I NEVER WALK

By Helen Welshimer
I NEVER walk
On any street
Without a prayer
That we won't meet.

I AM afraid
That you may guess
Time hasn't made
Me love you less.

BUT more than that
I'm afraid I'll find
That you can meet
Me and not mind!

Quintuplets? Humph! Here're Tridecuplets

As might be expected of a Great Dane, this dog went in for motherhood in a big way. Originally there were 14 puppies in the litter, but one of them was accidentally killed. The 13 surviving puppies (tridecuplets if you insist) are pictured answering the dinner call at the home of Paul Berlebach, former prize fight champion, in Astoria, L. I.

Weekly Sunday School Lesson

Text: I John 5:1-12.
The International Uniform Sunday School Lesson for December 30.

By WM. E. GILROY, D. D.
Editor of Advance

From the Christmas story of the coming of Jesus into the world, we turn to the picture of Christ as King and Conqueror.

The topic of our lesson is "Victory Through Christ."
"Be of good cheer," said Jesus to his disciples, "I have overcome the world." Our lesson is a commentary on these words. In His overcoming of the world, Christ gives victory to individual men in their effort to overcome sin and selfishness.
We are living in a world that offers constant incentives to selfishness where it does not tempt men to the grosser sins. Selfishness is in reality the deepest of all sins and is at the root of all sins, but it appears to us clothed in disguised and sometimes attractive forms.
A man may be very unselfish toward his own family or his own group or his own country, but at the same time ruthless in actions as they affect other people and other countries. A man may clothe under the guise of ambition, success, and what is called "enlightened self-interest," a course of life that is utterly out of harmony with Christmas service and the principles of love and brotherhood.
To overcome the world in our own hearts and in our own lives is no cheap or easy victory. We cannot accomplish it unless we live on a high plane where we have the constant inspiration of communion with those who have lived nobly and who have left us a good example.
The height of all such communion with the most inspiring example that it offers and the power of a Savior to help us is in our relation to Jesus. To find God revealed in Him, to live so near to Him that his power upholds us and guides us, is to win the victory

of faith.
Deep and wide in all our life today is the need of victorious Christian living. We are in a world in which we are talking of new deals and reconstructions, and no sensible man will disparage the need of applying courageous intelligence in the effort to discover better methods of organizing and conducting our social life.
When man finds abetter instrument or tool for his purpose than the one he is using, he does not need to be urged to use the new one and discard the old one. And there is a sense, therefore, in which, as we discover a better way of society and men become convinced that it is a better way, we shall enter that way very much as we adopt new inventions and better methods in the physical world.
But underlying all our external life is a persistent problem of man's relationship to his fellow man. No matter how much we improve outward conditions, or social organization, there will still be tragedy in human life where sin and selfishness continue.
When the social engineers have done all in their power to plan and better society, we shall be far short of its achievement unless men have the will and purpose to live in right relationships with one another. Meanness and sordidness and selfishness will find a means of defeating the highest purposes, unless they themselves are conquered and driven out by love and

goodness.
To overcome evil with good is the method and goal of the great struggle in which all good men and women are engaged. This was the supreme purpose of Jesus in coming into the world, and it is the victory through Him we may achieve.

Tokio

Mr. and Mrs. George Tommly and daughters, Misses Ada and Juanita of Nashville visited their daughter Mrs. A. M. McLarty and Mr. McLarty Monday.

Mr. and Mrs. C. W. McLarty and children were trading in Nashville Wednesday.

Tracy Morris was a business visitor to Nashville Wednesday.

A. C. Holt was a Nashville visitor Wednesday.

M. L. Stewart of Hot Springs was a Tokio visitor Wednesday.

Mrs. Henry Edmiston of Nashville visited her parents here Thursday.

Mr. and Mrs. L. A. Stewart were trading in Nashville Saturday.

Mr. and Mrs. Bob Blackwood was trading in Nashville Saturday.

J. S. Harris was a business visitor to Nashville Saturday.

Warland Stewart of Broken Bow, Okla., is visiting relatives here.

Hammons Rumored for Reddies Coach

Hope Mentor Among Several Mentioned as Sherman's Successor

ARKADELPHIA, Ark. — Football coaches of several states have applied for the position of director of athletics at Henderson State Teachers College to take the place made vacant by the resignation of Coach Eugene (Bo) Sherman.

There have been several Arkansas men to seek the post, some of whom are graduates of Henderson. The college authorities have not given out the names of the applicants. It is probable that President Womack, who is visiting relatives in Tennessee, may confer with applicants who live in that state and in Kentucky.
Henderson graduates who have been mentioned as able to carry on where Bo Sherman left off are Allen Berry, former star guard, who is a graduate of Vanderbilt where he starred as a line man and who now is coach at Smackover High School; Robert Thompson, now coaching at Gordon High where he developed Duke Wells and other players who subsequently have starred in college football; Ed Sherman, quarterback at Henderson from which he will graduate in June and Foy Hammons, coach at Hope High School and former coach of Ouachita college, Monticello A. & M., and Pine Bluff High.

John R. Cooley and Finley Stewart were in Nashville Saturday on business.

Mr. and Mrs. Oscar Wisdom was trading in Nashville Saturday.

Bert Thompson of Blingen visited relatives here Saturday.

The Bavarian State Opera in Munich is to have a new revolving stage of two floors. The new stage can be raised or lowered ten yards. While the performance is proceeding on one stage, settings for the next scene are to be prepared on the second floor, permitting an almost uninterrupted performance.

In England, more than 100,000 war widows have remarried, leaving only 140,550 still receiving pensions.

MIDDLEBROOKS'
NEW GROCERY
Phone 607 Prompt Delivery

"There's the doorbell again"

Suppose daily to your door came the butcher, the grocer, the clothier, the furrier, the furniture man, and every other merchant with whom you deal? What a tedium of doorbell answering that would mean!

It would be even more impractical for you to visit daily all these stores to find out what they have to offer and the price. And yet you need those merchants' service quite as much as they need your patronage. Contact between seller and consumer is essential in the supplying of human needs. Before a sale can be closed the goods must be offered. Every day, through the advertising columns of this newspaper, the merchants of this city come to your home with their choicest wares. Easily, quickly, you get the news of all that is worth while in the market-places of the world.

They are not strangers at the door, but merchants you know and trust. You are always surer of high quality and fair price when you buy an article advertised by a reputable firm.

BOOTS AND HER BUDDIES

Harmony

It seems as if winter has really begun. Mr. and Mrs. Edwin Britt and baby have returned home after spending Christmas with his parents near Prescott. Mr. and Mrs. Glyn Britt accompanied them home for a few days visit.

Mr. and Mrs. Joe Daugherty and children spent Tuesday with G. H. McMillen and family.

Mr. and Mrs. Thurman Landes and baby of Louisville spent Monday night with Mrs. Ella Hodnett and Mr. and Mrs. Thad Vines.

Milton Rogers and wife spent Saturday night with Thad Vines and family.

Mr. and Mrs. Ray McWilliams and little son, were Monday night guests of their grandparents, Mr. and Mrs. J. W. McWilliams.

Ray McWilliams is on the sick list this week. Hope he shows improvement soon.

Mrs. Nellie Leach and son, Leo Farmer were Hope visitors Monday and Tuesday.

Mrs. Clint Martin of Colorado Springs, Colo., arrived Sunday of last week to join her husband, Clint Martin, who was already here. They will make their home some where near Shover Springs.

A gigantic hand, made of glass and illuminated by electricity, opposite the Munich railway station, draws the attention of tourists to the various interests of the town.

The Bank of England is permitted to brew beer for public sale without license, or it might turn to pawnbroking, which the terms of the charter are wide enough to cover.

Radio typewriters may soon replace 15,000 miles of leased telephone wires if experiments by the Bureau of Air Commerce prove successful. The typewriters will be used to send out weather maps and data.

At one of the largest pheasant farms in England, on the borders of Sussex and Hampshire, 500 hen pheasants are kept in captivity and at least 150,000 eggs are sold annually.

New Ford V-8 De Luxe Tudor Sedan Shown

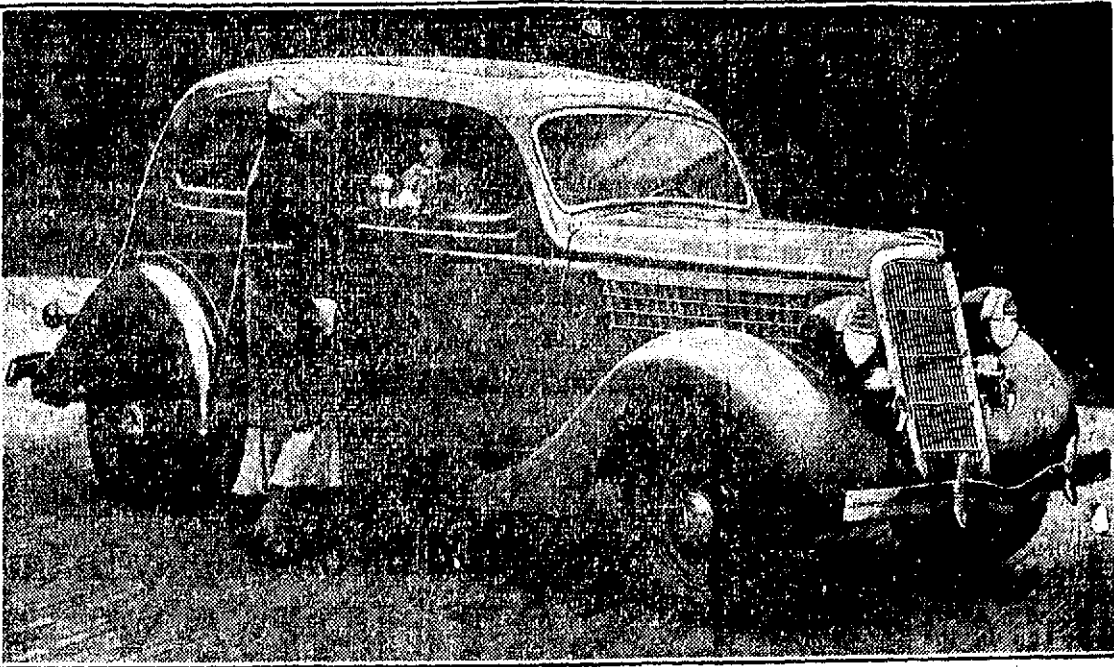

PHOTO shows the new Ford V-8 De Luxe Tudor sedan for 1935, which has just been announced. The body lines are distinctively modern and a departure from previous Ford

standards. The cars feature many engineering improvements providing greater riding comfort and increased ease of control. The engine has been moved forward. Passengers

ride closer to the center of the car. The Ford V-8 engine now has a new system of crankcase ventilation. The Tudor sedan is also available without de luxe equipment.

DEARBORN, Mich.—Henry Ford Thursday showed to newspapermen here the new Ford V-8 for 1935. Most striking feature of the new car is body lines which are distinctively modern and a definite departure from any previous Ford design.

The new car also embodies a combination of major engineering developments aimed at increased riding comfort—which has been called the "center-poise" ride.

Numerous improvements in chassis design to provide increased ease of control also are included.

Two important improvements have been made in the Ford V-8 engine, of which more than 1,300 are now on the

road. In addition Ford has developed a new type of body—the touring sedan, with unusually sleek lines and embodying a fitted rear trunk compartment integral with the body.

Safety glass is standard equipment not only in windshields, but also in all doors and windows in all body types.

The new car marks the present culmination of developments begun by Ford three years ago at the time of the announcement of the V-8 engine. In the three years intervening, Ford has been engaged in the development of a combination of engineering improvements aimed at providing a degree of riding comfort and ease of control comparable with the performance of the engine itself. The new body designs are a further evidence of the progress of Ford engineering.

In appearance, the new cars are characterized by a freshness of conception utilizing flowing curves to carry out the modern motif, plus a new treatment of interior and appointments which sound an entirely new note in Ford body styling.

The engineering advances in engine and chassis are comparable in importance. Principal among these is the new "ride" effected by the new spring suspension system, proper car weight balance and passenger weight distribution and the location of the passenger closer to the center of the car—so that they ride between the wheels.

To accomplish this, the front spring, which has been lengthened, is located more than four inches in front of the front axle and the engine is moved forward more than eight inches so that its weight rests over the front axle. Front and rear springs have been made more flexible. Added chassis room available as a result of the front end improvements permits redistribution of the passenger weight—now concentrated between the wheels—so that the weight on the two axles is approximately equalized, giving rear seat passengers the comfort of a "front seat" ride.

Key to the changes made in outward design is found in the relocation of the front spring and engine. This has permitted moving the body forward so that passengers ride between the axles, and the development of rear quarter panel treatment along flowing lines. The car is approximately eight inches longer from bumper to bumper.

The modern design note is carried without break through the new slanting vertical grille with horizontal beading, the sweeping line of the low hood and more sloping slanting windshield, the beautifully molded body and the flowing rear quarter panel. Fenders are deeper and more highly crowned, with sweeping skirts.

Bodies are materially wider. Slanting vertical louvers with horizontal stainless steel beading are combined to form an attractive hoodside adornment. The radiator ornament is fixed in position, the radiator filler cap being under the hood.

Wheels are smaller, tires larger. The hub caps are adorned with a new and modern treatment of the V-8 insignia. The result is an impression of mass and stability most pleasing to the eye.

Interiors are roomier, with wider seats—front and rear. Span of the front seats has been increased up to 5 1/2 inches, providing room without crowding for three persons in bodies with full-width seats. Driver's seat in all closed cars is adjustable. Upholstery and appointments harmonize with the remainder of the design.

Engine improvements include: Addition of a new system of direct-flow crankcase ventilation, which exhausts water vapor and gases from the crankcase and valve chamber. This minimizes the collection of excess water in the oil and lessens formation of sludge. Dilution of the oil by unburned gasoline is reduced. The continuous flow of air also exerts a cooling effect which tends to lengthen oil life and minimize engine wear.

A new cast alloy iron camshaft. Additional major chassis improvements include: Newly designed, internal expanding mechanical type brakes, intended to give more effective braking control—with less pedal pressure—and embracing a new "floating wedge" as part of the design. This aids in equalizing pressure upon brakeshoes and in turn upon the drums. Additional drum ribs give a 40 per cent increase in cooling effect.

A new clutch of simplified design requiring less pedal pressure at starting and gear-changing speeds and with much softer action. At higher speeds the pressure is increased by centrif-

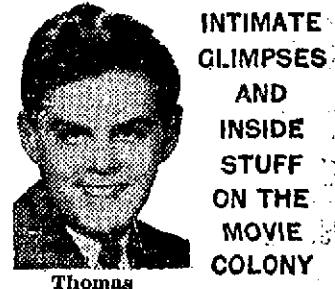

ugal weight action to increase the power transmitting capacity of the clutch.

New, stronger, more rigid frame, heavier front and rear radius rods, wider rear wheel tread and a strengthened rear axle.

Nine body types are listed. The following are available with de luxe equipment: Phaeton, roadster, 3-window coupe, 5-window coupe, cabriolet, Tudor sedan, Fordor sedan, Tudor touring sedan, Fordor touring sedan. The roadster and cabriolet are fitted with rumble seats.

The 5-window coupe, Tudor and Fordor sedans also are available without de luxe equipment.

HOLLYWOOD GOSSIP

Thomas

BY DAN THOMAS
Huge Tank Is Setting For World Scenes

Hollywood—Without actually seeing them, it's almost impossible to imagine some of the things that can be done in a motion picture studio.

This was brought to mind rather forcibly when I wandered out to the tank set, located 'way at the back end of the Paramount studio—and a good walk from the main entrance. I might add,

At the present time this area, about 300 feet square, is covered with a Cuban village built for "Rumba," the new Carole Lombard-George Raft picture.

Huge boulders, made of a light composition covering over a wooden framework, form a small hill at one side of the level ground where most of the dancing is done.

Coconut and palm trees dot the entire set, which is filled with vines and other tropical plants. Truly, it looks for all the world like an authentic Cuban setting.

Yet, a couple of months ago on this exact spot I saw Cleopatra's barge sailing majestically over the blue waters of the Mediterranean. Bayren and realistic looking hills stretched back from the shoreline. The barge itself was a miniature about 15 feet long, and the hills were painted on a canvas back drop.

Before that, the tank was a swirling muddy jungle river for "White Woman." Also it has served as the Atlantic Ocean and the Mississippi river.

Calm or Turbulent
As its name implies, this set contains a huge tank which will hold approximately 20,000 gallons of water. At times the water has a mirror-like surface. However, by using large paddles and wind machines, a terrific "ocean hurricane" can be stirred up. Paddles also are used to create the swift, swirling currents of a river.

Equipped with both steam and ammonia pipes, the water can be heated for comfortable swimming during the winter months, or the entire surface can be frozen overnight for an Arctic setting.

For the "Rumba" set it was necessary to drain the tank before the Cuban village could be constructed. Although a rather expensive procedure, this had to be done, as none of the Paramount stages is large enough to accommodate a set of this size. The tank is built outside, its only covering being a huge sheet of canvas.

Cold in Inferno
It's beginning to appear that Hollywood's version of "Dante's Inferno" isn't such a hot place after all. After working for one day on the Inferno set, Spencer Tracy went home with such a bad cold that he had to remain in bed for two days.

The Nose Knows
If Nick Foran, the big red-headed Irishman who made such a hit in "Gentlemen Are Born," doesn't get rid of the coyote he shot recently, he'll soon be asked to leave his car outside the studio. Ever since his return, he has been carrying his prize around in the trunk on his car so that he can show it to all his friends. Now he doesn't even have to bother opening the trunk—they can smell it.

Realism in Movies
Found: A father who doesn't like the idea of his son being in motion

VACCINE FOUND FOR

(Continued from Page One)

ferring immunity. This paralysis vaccine is made from spinal cords instead of brains, but is treated with formalin like the new sleeping sickness vaccine.

Equally effective and possibly a little faster working is infantile paralysis vaccine described at the same meeting by John A. Kolmer M. D. of Temple University.

The vital difference in the two vaccines is that the Philadelphia virus is living while the New York virus is dead. This offers medicine a two-edged weapon for meeting infantile paralysis attacks.

The Philadelphia vaccine is also made from spinal cords, but treated with sodium ricinoleate, which weakens the virus to the point where it seems to do no harm. It has worked successfully on 25 children. Dr. Kolmer said it is ready for combating epidemics.

Likened To Broadcasting
Your body works like a radio broadcasting system, with the central sending station in your brain and spinal cord and each muscle "tuned" to receive messages only on a certain "wave length band" different from every other muscle.

Though the brain does not actually send out radio waves, the idea of a broadcasting system is the newest and best way of explaining how the brain controls the body. Prof Paul Weiss of the University of Chicago told the association. It supplants the old idea that the nervous system operates like a telephone switchboard.

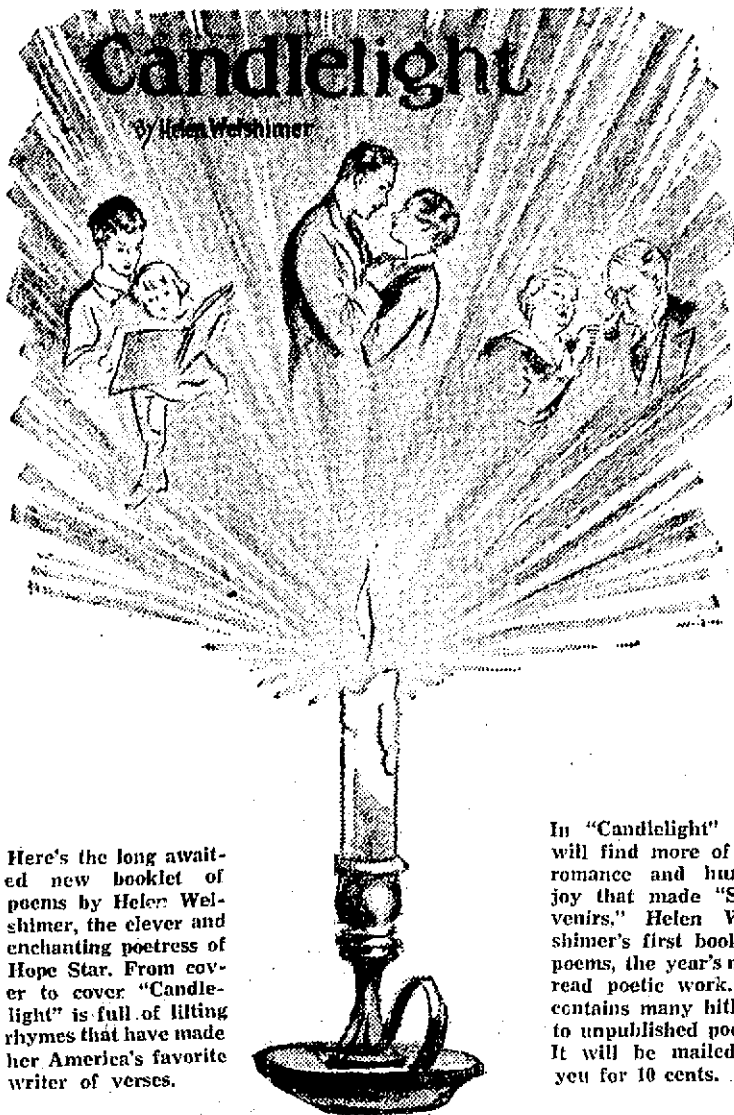

For example when you start to walk out of a room, a whole set of orders to different muscles is flashed from the brain, but your hand muscles are "tuned" to pick up only the orders to open the door, while your leg muscles pick up only the command to start walking.

The nerves in each muscle are the "receiving sets" and pick up only the orders intended for that muscle. The nerves in the hands select only messages for the hands, like orders to pick up a glass, to write or to punch someone. Nerves in the legs take only leg orders; those of the mouth pick up only such signals as to chew, talk or yawn.

Just how the orders from the brain are transmitted is not known, though many scientists believe it may be by some sort of tiny electric current. Professor Weiss believes nerves with specific substances that make them sensitive to the right messages, or sensitize them in some other way.

One of the world's greatest books on etiquette was written by Napoleon Bonaparte.

pictures. He's the father of 2-year-old Dickie Walters, now playing Lee Tracy's son in "Carnival." When the youngster was signed, the elder Walters went around bragging about the new actor in the family. But now it's a different story—and all because, at dinner the other evening, Mrs. Walters told Dickie to pass his plate to his father. To which Dickie replied, "Father is working at the studio—that is Mr. Walters."

Here's the long awaited new booklet of poems by Helen Welshimer, the clever and enchanting poetess of Hope Star. From cover to cover "Candlelight" is full of lulling rhymes that have made her America's favorite writer of verses.

In "Candlelight" you will find more of the romance and human joy that made "Souvenirs" Helen Welshimer's first book of poems, the year's most read poetic work. It contains many hither-to unpublished poems. It will be mailed to you for 10 cents.

HERE AND THERE

(Continued from Page One)

all the clatter that goes along with an aged and decaying nation.

That is what we have to shake loose from—and not the depression.

We have to shake loose from our old selves—a weak and stupid and belly-aching race of men.

X X X

Let us dedicate ourselves in 1935 to the original America.

A land in which all men worked, and were proud of it.

A land in which men made as much money as they honorably could—but put back the last dollar for fear God or a panic would strike them down.

A land in which men lived truly for themselves—and not for the insatiable of money and caste and hypocrisy which made life unbearable in the Old World and compelled our ancestors to look to the West.

This is the Western World, even today—and let us this New Year's turn our thoughts inward to make of ourselves new men, so that we may be able to make the most of our opportunities as the world and our country rise off the floor of the panic.

The number of unmarried women between 20 and 30 years of age is stated to be the highest ever reached, due in a great part to the losses of man-power in the World War.

The first telephone directory in New York City was issued in 1878 and barely filled one side of an ordinary sheet of paper.

We signed a contract. We promised to pay. It's the only honest thing to do.—Risto Ryti, governor of the Bank of Finland, on payment of U. S. war debt.

Something overcame me—Albert Howard Fish, who confessed slaying Grace Budd six years ago.

I had always regarded myself as an American citizen, until I talked to Mr. (Newton D.) Baker. Then I discovered we were regarded as a species of outlaw.—Pierre S. du Pont.

I'm a country doctor. I've been one for 27 years, and I'm going back to where I belong.—Dr. Allan Roy Dufoe.

A satisfactory social organism cannot grow out of an unsocial seed.—Bishop Francis J. McConnell, former head of the Federal Council of Churches.

Concert at Stamps

The Stamps quartet will present a musical concert Saturday night in the auditorium of Patmos High School. A portion of the proceeds will go to the school. The program starts at 7 o'clock.

The Eiffel Tower is said to stretch as much as 11 inches on hot days.

Borer From Within

Enthusiastically as a young reformer just starting on his career, Senator William E. Borah of Idaho in a speech before Eastern Republican leaders meeting in New York, urged that the young men of the party oust the die hards and divorce themselves from big business control. The three action pictures reflect his vigorous speaking personality.

By HARRY GRAYSON

When the Louisiana State varsity became as hot as the argument between Huey Long and Biff Jones and edged out Oregon in the final period at Baton Rouge, it marked the fifth defeat for representatives of the proud Pacific slope in seven major inter-sectional football games during the 1934 season.

It seemed that every other section had something superior to the coast. Pittsburgh carried the eastern banner to a 20-6 victory over once mighty Southern California, and Notre Dame the midwestern flag to a 14-0 decision over El Trojan.

Washington State, which went through the Pacific Coast Conference campaign without a reverse, bowed to Detroit 6-0.

Texas Christian upheld the prestige of the southwest with a 6-7 triumph over Santa Clara, the squad that tied Stanford and which was rated on San Francisco bay form charts second only to the Cardinals among far western teams.

In minor engagements, Idaho bested Creighton, 13-0, and Gonzaga finished in front of Washburn and battled Wichita to a scoreless tie on an invasion of Kansas, but from an inter-sectional standpoint the past season was the worst ever experienced by coast clubs.

Stanford Strives to Regain Lost Prestige

If Alabama prevails over Stanford at Pasadena on New Year's Day, as a majority believe the Red Elephants will, residents of the golden shore will have to console themselves with the Palo Alto's easy verdict over Northwestern and the conquest of Fordham by Saint Mary's.

The natural reply of all other groups to that would be, "What team didn't beat Northwestern and Fordham?"

It wasn't so long ago that outfits like Oregon State, with ordinary records at home, crossed the Mississippi and ran rampant against supposedly formidable mid-western and eastern rivals. Then it was that Southern California was moving down combinations like Pittsburgh and Georgia, and playing Notre Dame off its feet.

Coast football perhaps reached its peak in prestige in 1928 when a Stanford steam-roller followed an Oregon State tank into New York. The Aggies were not highly regarded before they trimmed a good New York University combination, 25-14, on Thanksgiving Day. There were the inevitable reverses about the young giants of Corvallis, but Broadway hadn't seen anything yet.

Two Looks Convince Army Warner Is Right

When Pop Warner unleashed one of his finest Stanford teams against Christian Keener Cagle and his Army mates two days later, and wrecked the Cadets, 26-0, numerous All-American pickers expressed the wish that they could reconsider their selections and nominate Biff Hoffman, Herb Fleishacker, Sims, Post, Roblesky, and

4.74 INCHES RAIN

(Continued from Page One)

day, however, with the wind down to 150 miles an hour.

Two deaths were recorded in New England. A woman died on the steps of her son's home in Wakefield, and a dockhand was swept into Boston harbor. Shipping was delayed and endangered.

The Belgian freighter Emile Francoeur with 35 aboard limped through a blinding snowstorm into Halifax harbor in tow of two rescuing ships, one the tug Foundation Franklin which was in trouble itself in going to the aid of the rudderless freighter.

At Halifax, too, the gale fanned a blaze that swept a large warehouse on the waterfront and destroyed a schooner floating nearby. With the warehouse ruined, the fire died down.

The sub-zero wave had relaxed in the Middle West after sending the mercury as low as 39 below in Minnesota.

Townfolk of Olney, Ill., on this coldest day of the season, voted on building a municipal swimming pool.

the entire Cardinal and White personnel.

It was a perfect setting for Warner, the master showman, and the old master saw to it that Hoffman, Sims, and other expert ball handlers made the most of it. Confining himself to one football, the late Harry Houdini couldn't have taught the Cardinals more feats of legerdemain.

This rout and a 34-13 smothering at the hands of Stanford "way out west" the following year led to the double wingback Warner system being installed at West Point. Maj. Ralph Sasse, the incoming coach, studied it at Palo Alto during the Cardinals' practice the following spring.

These dizzy and delightful days of leadership are only pleasant memories of the rabid coast football fever now, however, and life won't be worth living if Stanford happens again to stub its toe in the Rose Bowl.

U. S. Indicts Two Lawyers In Crime War

Mathers

Federal indictment has been returned against James Mathers, prominent Oklahoma criminal lawyer, charging he received part of the \$200,000 Ollman Urschel ransom. Mathers defended Harvey Bailey, who was given a life term.

Laska

Also indicted was Ben D. Laska, Denver attorney, likewise charged with "illegal participation in division of the ransom." Laska defended Albert Bates in the Urschel case and the Sankeys in the Beecher abduction case.

PUBLISHERS MEET

(Continued from Page One)

nounced Thursday night by Howard Davis, chairman of the publishers' national code committee, is the result of action of the labor relations board in recommending to NRA that the Call-Bulletin be deprived of its blue eagle for not reinstating Dean S. Jennings, a rewrite man, after the board had ordered it to do so.

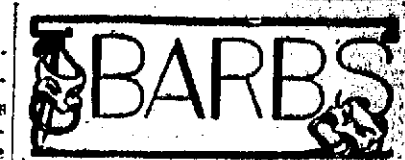

Davis, in a statement, expressed the opinion that this action constitutes "an attempt to usurp power over the code for the daily newspaper publishing business."

He said a convention of the 1200 daily newspapers under the code will be called "immediately" to consider the action "as it affects their continuance under the code." He did not announce the time or place of the meeting.

The Call-Bulletin, a Hearst newspaper, was ordered by the labor relations board to re-employ Jennings after he charged he was forced to resign because of his activity with the American Newspaper Guild.

The paper, contending the news-paper industrial board and not the labor relation's board should have heard the case, failed to heed the labor board's decision. Thereupon the board Thursday referred the matter to the NRA compliance division with a recommendation the Call-Bulletin's blue eagle be removed.

Davis' statement said the board's action "is regarded by the six associations of daily newspaper publishers which co-operated in the preparation and submission of the code as a violation of the code."

Coach Biff Jones of Louisiana State University talked back to Huey Long and quit. It still remains Huey Long's university.

For the first time in diplomatic history, the word "I" was used in a note Mussolini sent to the League of Nations, and some of the delegates still wonder what he means.

The National Resources Board has found an easy way to get rid of Communists and loafers—a 25-year plan that will provide work for all.

A policeman caught a crook in New York and immediately began questioning him, punctuating his questions with a suitable black and blue mark on each eye.

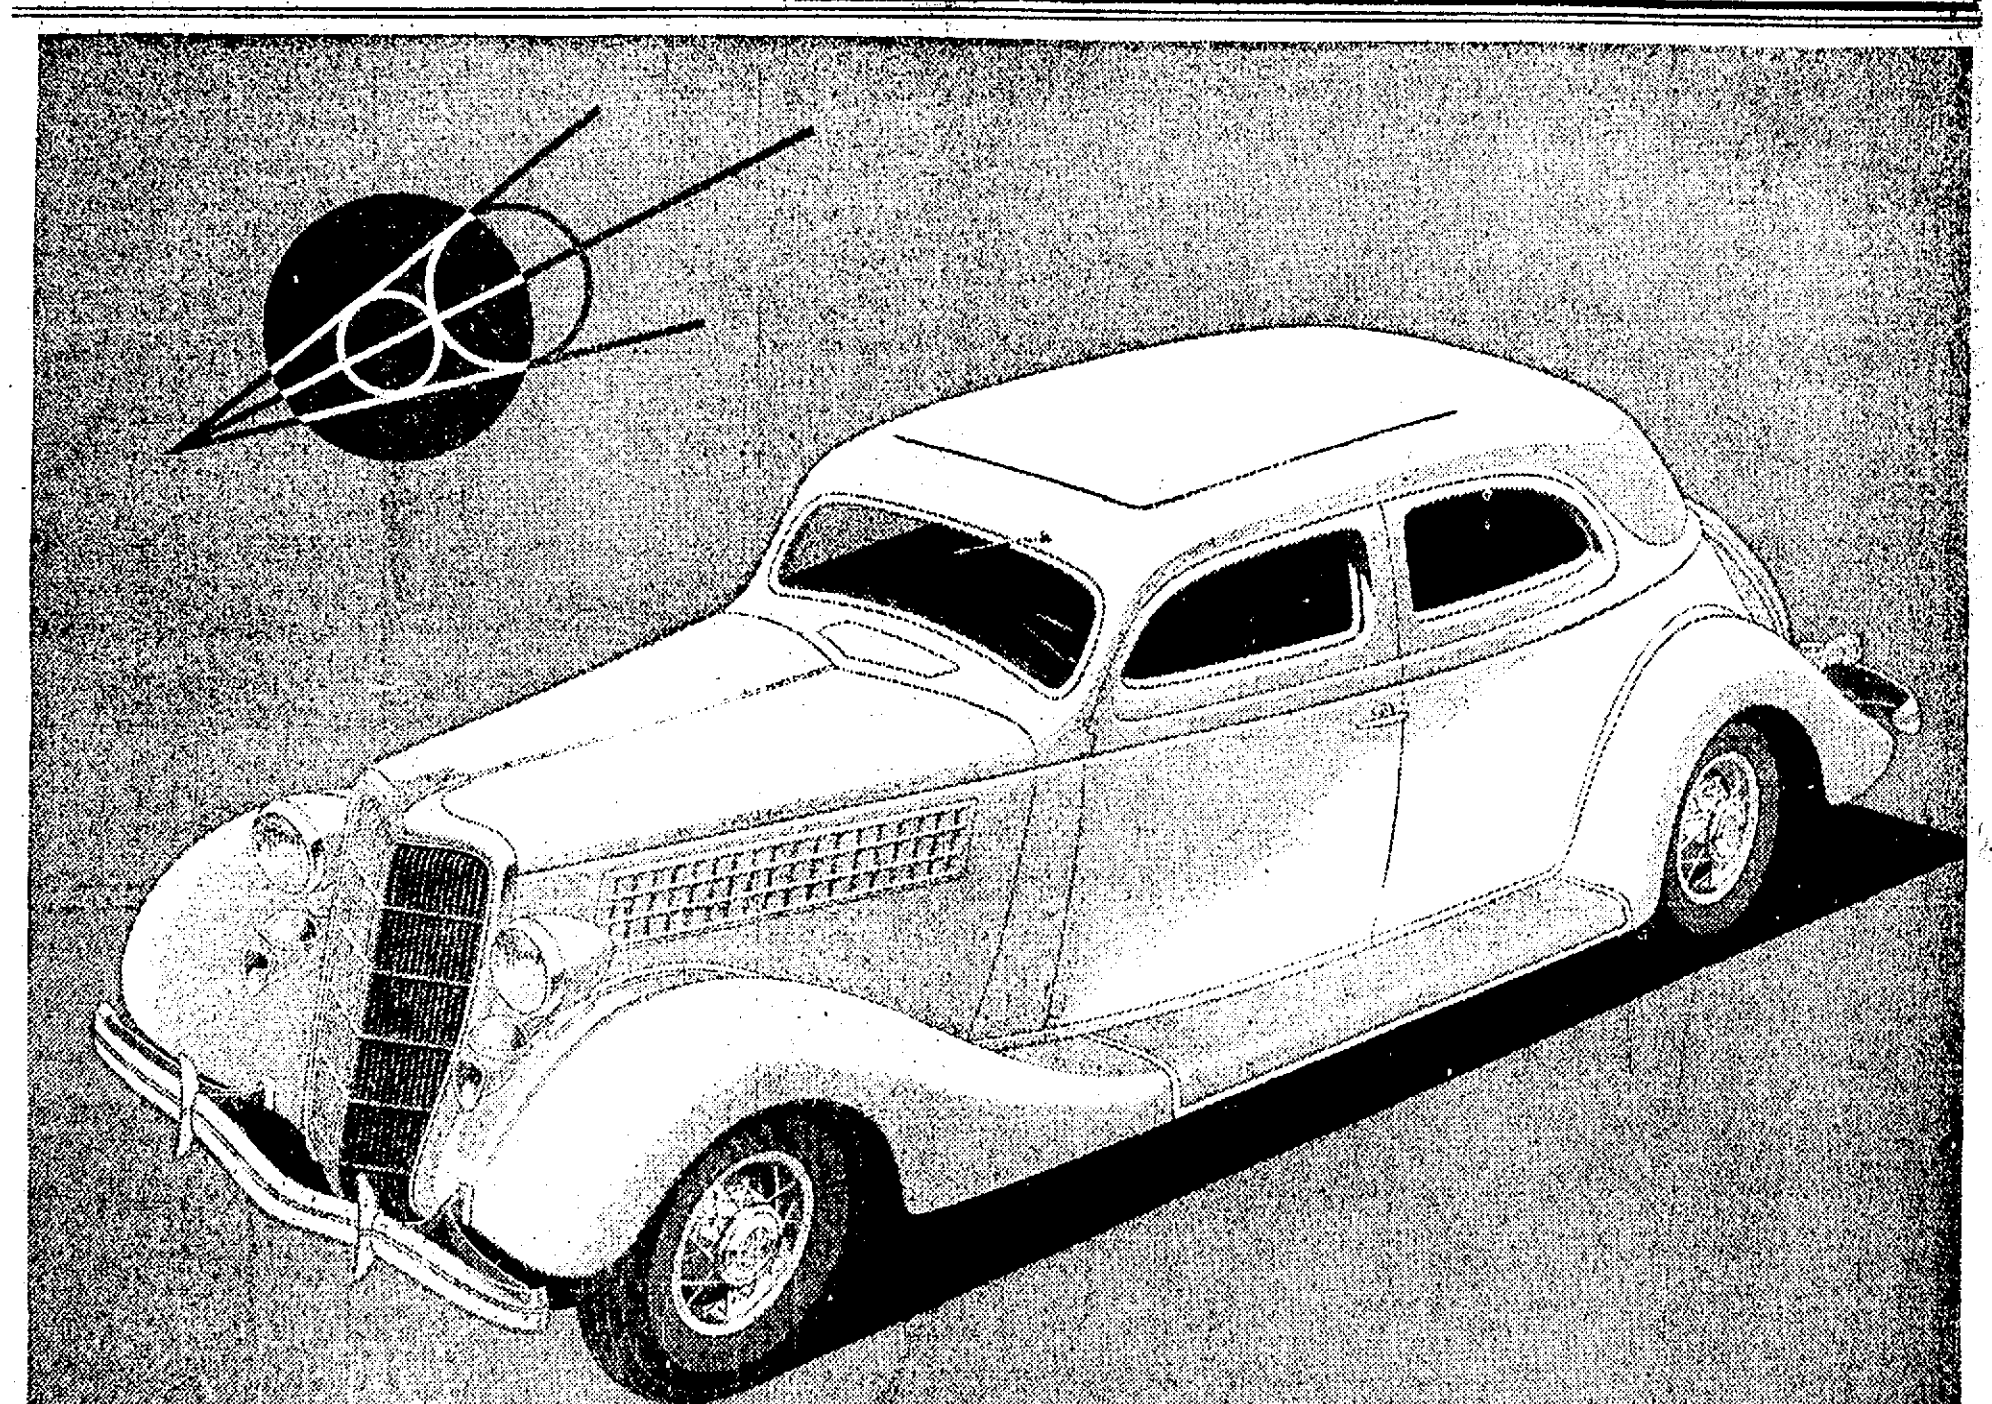

The New 1935 FORD V-8

Will Be On Display In Our Showrooms

SATURDAY, DEC. 29

EVERYONE IS INVITED TO COME IN AND SEE THIS NEW WONDERFUL CAR

HOPE AUTO CO.

THE NEW FORD V-8 FOR 1935

The New Ford V-8 for 1935 is the biggest and roomiest Ford car ever built. It is a strikingly handsome car, with modern lines and new, luxurious appointments.

But most important of all it is designed to give you smooth, easy riding over all kinds of roads—"a front-seat ride for back-seat riders."

This ease of riding is achieved by the use of three basic principles never before combined in a low-price car.

1. Correct distribution of car weight by moving engine and body forward eight and a half inches.

2. New location of seats, with rear seat moved forward, toward the center of the car—away from the rear axle and away from the bumps.

3. New spring suspension which permits the use of longer, more flexible springs and increases the spring-base to 123 inches.

The result is Center-Poise—which not only gives you a new riding comfort but adds to the stability of the car and its ease of handling. You can take curves with greater safety.

There are many new features in the Ford V-8 for 1935 which make the car still easier to drive.

INTRODUCED TOMORROW

A New Ford V-8 That Brings New Beauty, New Safety, and a New Kind of Riding Comfort Within Reach of Millions of People

New brakes give more power for stopping quickly with far less foot pressure on the pedal. A new easy-pressure clutch employs centrifugal force to increase efficiency at higher speeds. New steering mechanism makes the car still easier to handle.

The New Ford V-8 for 1935 retains the V-8 engine which has demonstrated its dependability and economy in the service of more than a million owners. There are refinements—including crankcase ventilation, cast alloy steel crankshaft and copper-lead floating connecting-rod bearings—but no change in basic design. You buy premium performance when you buy this Ford V-8—full 85 horsepower and capable of 80 miles an hour.

Other 1935 Ford features are Safety Glass throughout in all body types at no extra cost. New welded all-steel bodies. New wider rear doors. (Front doors hinged forward.) New lower double-channel X-type frame. (Makes it easier to get in and out of the car.)

Rich, modern body colors, including a new gun-metal finish of striking beauty on De Luxe body types. Luxurious new upholstery and appointments.

New, wider pillowed seats and softer seat cushions. (Front seats are 4 to 5 1/2 inches wider.) Clear-Vision Ventilation, with adjustable cowl ventilator and a windshield that opens. Combination fuel and oil gage and heat indicator on new,

modern instrument board of the De Luxe body types.

The spring leaves are tapered for quiet as well as flexibility. Larger tires have a new, wider tread, specially designed for safety and comfort. Bodies are insulated for quiet and temperature.

We invite you to see this New Ford V-8 at the showrooms of Ford dealers. You will want to ride in it—to drive it yourself. You will find it a new experience in motoring.

Ford V-8 Prices Are Low
